

SOLIDARITY CLINICS TO TREAT PATIENTS FREE WITH SIOOT OZONETHERAPY

September 9, 2020 (Italy)

Ozone therapy has been used to treat COVID patients in 15 Italian hospitals; in some cases, it saved people on their deathbeds; solved health problems resulting from coronavirus; gotten rid of pain; disabled all kinds of bacteria, viruses and fungus; calmed inflammation; and proven effective in treating more than 50 types of diseases. We are talking about SIOOT oxygen ozone therapy, an innovative medical treatment that brings enormous benefits. It is safe, easy to practice, leaves no residues or side effects, and it is inexpensive and natural.

Ozone is a substance that the immune system produces to counteract any type of infection.

The Ozone Solidarity Onlus will provide SIOOT ozone oxygen therapy to the Italian people by organizing a week of "solidarity clinics" from 21 to 27 September 2020. Thanks to collaboration with the Scientific Society of Oxygen Ozone Therapy (SIOOT), low-income patients suffering from various diseases will be treated free of charge in the clinics of about one hundred doctors specialized in ozone therapy in all regions of Italy.

For any information and adherence to the week of solidarity clinics you can contact:

Phone: 035 19910105

E-mail address: info@ozonosolidaleonlus.com
